Mr. A. B. Maghem,

c/o Department of Water Supply,

Room 2449, Municipal Building,

New York.

Dear Sir:-

During a conversation over the telephone yesterday we were informed, by a gentleman from the Department of Water Supply, that you were the one who has charge of the water supply in this particular part of the city.

We are trying to get some information concerning the Water Supply on 155th Street from Broadway to Riverside Drive. At present the contractor is grading the north side of the street, and is laying the side walk from the rear of The American Numismatic Society and the Hispanic Society of America. The side walk will be made of concrete, and naturally difficult and expensive to rip up. The American Numismatic Society's water connection is a kind of a temporary affair going under the side walk for the distance of about fifty feet to the end of the private main running from Broadway about one hundred feet west. The side walk will be lowered about four feet where this connection is, and I would like to know if we can lawfully make another connection at the same point to correspond with the lowering of the side walk so that our supply will not be frozen up during the winter. Is there a water main running from Broadway to Riverside Drive that we can connect to ?

Any information you can give this Society on this subject will be greatly appreciated.

Very truly yours,

Secretary.
